FAIR & TECHNOLOGY FORUM

INVITATION TO PARTICIPATE!

Northwest Community College will be home to the Green Fair/Technology Forum September 23-25, 2010. This event celebrates, educates and demonstrates types of green energy and living; and how to apply it in personal and /or business lifestyle. Free to the public, this event will feature exhibits, demonstrations, presentations and keynote speaker, Guy Dauncey.

You are invited to join the growing number of companies and organizations demonstrating their commitment to, and support of, a healthier environment and a more sustainable society. You may participate with an information booth and/or by providing a presentation .

As an exhibitor or presenter you will be able to:

- Promote your environmentally friendly company or organization
- Demonstrate how your business has made the commitment to be greener
- Create an environmental and educational exhibit or presentation to educate and inspire the public, students and our local business community.

Simply fill out the attached registration form and return it to Northwest Science & Innovation. Deadline for registration is August 20th, 2010. Early registrations are encouraged because booth locations are assigned on a first come, first serve basis and exhibit space is limited.
